

Harold Weisberg is a former newspaper and magazine investigative reporter, United States Senate investigator and editor, and an intelligence analyst-troubleshooter. His WHITEWASH was the first book on the John Kennedy assassination and its official investigation. He has completed eight books on the recent assassinations and is the only writer to have resurrected from official oblivion the most shocking suppressed evidence in the history of government.

WHITEWASH was also the first "underground" book. It opened the subject for public discussion and became a bestseller. Weisberg's knowledge of the evidence, both public and suppressed, is such the Warren Commission's lawyers refuse to debate him. They gave up a TV "special" rather than face him. His investigation of the President's autopsy brought to light what was used in two courts of law to establish that the President was shot other than officially claimed, that he was the victim of a conspiracy. Weisberg is now preparing a book on the evidence showing Lee Harvey Oswald was a government agent.

Weisberg is the one investigator trusted by all sides in this controversy. Those involved who would not speak to officials did and do speak to him. He has interviewed those avoided by the FBI and Warren Commission and from them learned what the government avoided and suppressed, a shocking 1984-in-advance story. He is the lecturer also trusted by the breadth of the political spectrum, by the right as well as by the left and center.

When Dr. Martin Luther King was murdered, Weisberg began an exhaustive inquiry into it, now embodied in a half-million-word study proving there was a conspiracy. As he was the first to say the evidence proves Lee Harvey Oswald shot no one, he proves that James Earl Ray, part of the conspiracy, was not the shooter. His work also shows that,

once Dr. King was assassinated and Ray framed with this murder the evidence proves he did not commit, the federal government took the lead in a campaign intended to eliminate the more militant blacks.

By the thousands of ordinary people who write him, by lawyers, judges, legislators, the press (which consults him regularly), fellow-investigators and countless audiences, ranging from young adults to chambers of commerce and professional groups, Weisberg is praised for the thoroughness and completeness of his research, writing and solid, documented presentation.

Where desired and when facilities are available, he can present selections from the thousands of once-suppressed documents and pictures he has saved from official oblivion. These include the framing of Oswald and of Robert Kennedy with responsibilities not theirs, the secrets of the President's autopsy, the suppressed involvement of racist-extremists, some of whom actually took credit for the assassination, the top-secret deliberations of the members of the Commission from which even their staff was banned, the brutal bombing of the Birmingham church in which black children were murdered - even the secrets of James Earl Ray's financial arrangements with his lawyers.

Lecture subjects include:

Black on Black: The King Murder and the Framing of the Accused

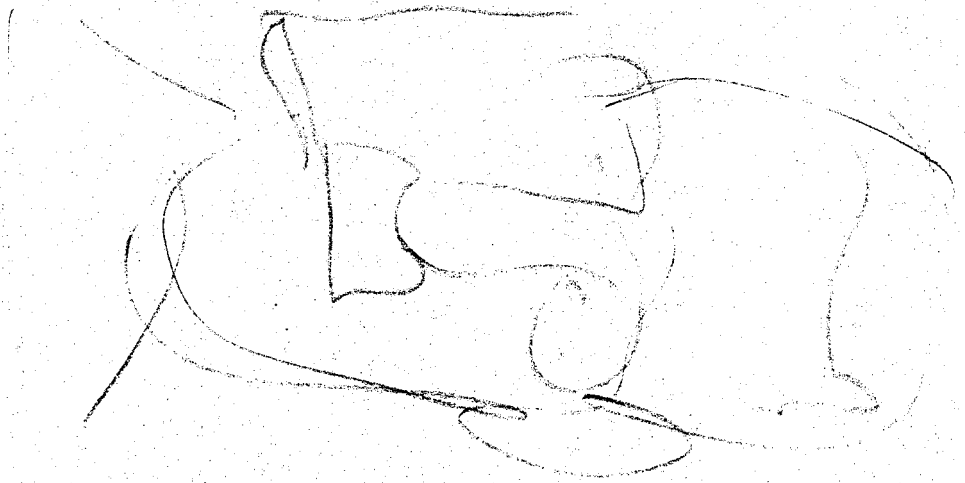

Post-Mortem: Secrets of the Suppressed Kennedy Autopsy

Oswald in New Orleans: The Untold Story and Setting Up the

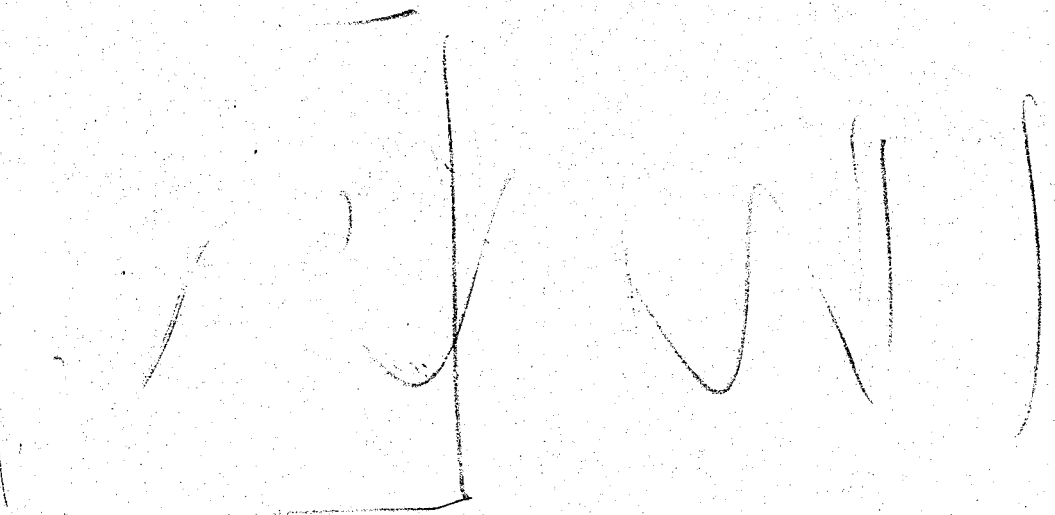

Patsy

Coup d'Etat: The Integrity of Society in the Era of Political
Assassinations
